**PERMIT NUMBER:**

This permit is a reissuance of a Montana Pollutant Discharge Elimination System (MPDES) permit for discharge of treated wastewater from the City of Harlem Wastewater Treatment Plant (WWTP) to the Milk River. A fact sheet is available for review, and describes the rationale for the permit renewal. The applicant operates a 3-cell aerated and 2-cell settling facility with continuous discharge and disinfection. The average facility design flow is 0.11 million gallons per day (mgd) and effluent is discharged from Outfall 001 to the Milk River. The proposed permit will continue to apply limits for 5-day biochemical oxygen demand (BOD5), total suspended solids (TSS), Escherichia coli (E. coli) bacteria, and pH. Proposed changes from the previous permit include more stringent limits for total residual chlorine (TRC), and proposed limits for ammonia, oil & grease, and nutrients. The proposed permit requires periodic self-monitoring of discharge quality and quantity, with monthly reporting of results. This permit and fact sheet will be submitted to the EPA for approval.
